Covestro
AT A GLANCE

Who we are

Covestro is a global leader in developing high-tech materials that make the world a brighter place. Our innovative solutions help make cars lighter and more fuel efficient, mattresses more comfortable, electronics better protected and homes better insulated – all while driving toward a more circular economy. Our vision? To become fully circular.

Our products

Did you know? You're never more than six feet away from a Covestro product!

We produce materials that are transformed into products you use and see every day – from the adhesives holding your shoes together to the plastic casing that protects your laptop! Our diverse product portfolio spans nearly every industry, including automotive, construction, electronics, furniture, healthcare and sports.

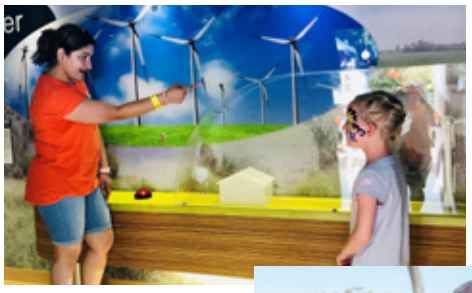
Our local presence

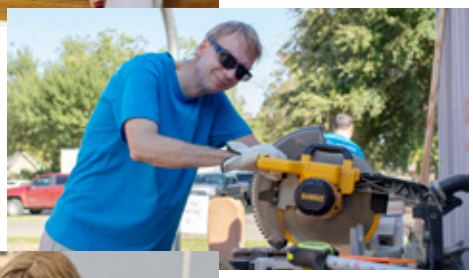
Located along the Cedar Bayou, the Covestro facility in Baytown, Texas began operations in 1971. The location is now Covestro's largest North American manufacturing site. Today, the facility produces raw materials for polyurethanes, polycarbonates, coatings, adhesives and specialties. These materials enhance every day products across diverse industries, including automotive, construction and healthcare. ISCC PLUS certified facility – enabling more sustainable production.

Giving back to our communities

Our passionate employees have countless opportunities to take their talents to the communities where we live, work and play, by helping non-profits solve business challenges, raising funds for a good cause, sharing our excitement for science with the next generation, and inspiring a cleaner future.



Creating a mobile exhibit to highlight renewable energy



Lending a helping hand to strengthen our community

Promoting greater awareness of technical career opportunities
