

# Information about the validity of the EcoVadis certificate

- Assessed companies can access and share their valid EcoVadis scorecard via the EcoVadis platform for one year (12 months). After 12 months the access expires.
- EcoVadis certificates are still valid after this 12 months period. Within the framework of the Together for Sustainability (TfS) Initiative, it was defined that the better the EcoVadis rating score (>45 points), the longer the scorecard will be considered meaningful and valid by TfS member companies.
- An update must be conducted no later than three years after a scorecard is published.

*Covestro has decided to participate in the assessment **every three years**.*

- As soon as we are rated again, our scorecard is updated via the EcoVadis platform and all trading partners will be automatically informed about our updated results.

Please contact us to receive our latest scorecard of 2022.
